	fall at home on the right femur deformity and shortening right proximal femur tenderness , moderated edema painful hip motion , no range of motion of right hip PXR femur : showed right intertrochanteric fracture femur ADMISSION FOR SURGERY ORIF FRACTURE RIGHT INTERTROCHANTERIC FEMUR	0			

Benefit Type: INPT

Admission Date: 24-Apr-2023

Discharge Date: 24-Apr-2023

Suggestive line(s) of management: Kindly enumerate the recommended investigations, and/or procedures For outpatient approvals only:

Code	Prov Code	Description / Service	Provider Desc	Type	Quantity	Cost	Remark
		Open reduction fracture femur with Internal Fixation unilateral					

RAD. REPORT

findings

=====

* evidence of right intertrochantric femoral neck fracture with impaction and seperable bone fragment is seen and gaping of bone edges is measured about 1.3 cm , for clinical correlation .

Diffuse osteopenia of examined bone , FOR DEXA SCAN correlation .

*Osteoarthritic changes of the right knee joint in the form of sclerosis of the articular surfaces, narrowing of the joint spaces and osteophytic lipping of the articular margins.

* Subchondral defect at medial tibial plateau , for further assesment .
